

# Insights from Data

REVIEW

HISTORY

## Requires Changes

1 specification requires changes

Hi, there!

This is an excellent submission! You presented three very interesting insights and backed them up with some robust analysis. Great job, keep it up! :)

However, you seem to have overlooked some aspects of the rubric. Don't worry, correcting this will not take very long. Please refer to my comments below.

START

## Completeness

✓

Three insights are reported using one Dashboard.

Awesome!

You reported three very interesting insights. Great job!

Read more about how to tease out insights from data visualizations and dashboard: [Find hidden insights in your data: Ask why and why again](#) by Tableau.

🔄

Each insight has an explanation describing how the insight was reached from the data.

For each insight, provide a screenshot that shows what you found in the dashboard.

Required Changes:

You need to explain all the steps you took to reach your conclusion. While this may seem obvious, it may also be the case that a few people reading your report might find it difficult to arrive at your insights, so let's walk them through the process. This includes providing cues like clicking, selecting and/or highlighting elements of the dashboard.

For example:

“... I selected the Cloud and Distributed Computing column to highlight the relevant country ranks, and proceeded to click on the green dot representing China...”

Insight explanations

Each insight has an explanation describing how the insight was reached from the data.

For each insight, provide a screenshot that shows what you found in the dashboard.

Awesome:

Great job adding a **descriptive** heading for each insight. This not only neatly demarcates your insights, but also gives your readers a heads up on what you're going to be talking about.

To Do Checklist:

✓

Explain all the steps you took to reach your conclusion.

✓

Make sure you provide cues like clicking, selecting and/or highlighting.

## Correctness

✓

Student's conclusions are correct based on the data.

You drew some good, air-tight conclusions from your analysis. You also presented ample data, facts and other information from the dashboard to back your findings. Terrific! :)

✓

The dashboard was used appropriately to find the information.

Your screenshots appropriately illustrate the written part of your response. Excellent!

Suggestions:

To take your report to the next level, you can try and annotate your screenshots so that your readers will be able to digest the information you're trying to convey easily.
