Storytelling with Data

REVIEW	HISTORY

Meets Specifications

Dear Student,

Congratulations on finishing the project 🎉

This was a brilliant submission. The work was exceptional! You did a great job and should be proud of yourself. After reviewing this submission, I am impressed and satisfied with the effort and understanding put in to make this project a success. All the requirements have been met successfully 💯 %

Keep doing the great work and all the best for future project.

Visual Storytelling with Data

✓	The visualization centers on a specific, clear finding in the data.
	Great work on previous suggestions!! Meets the specfgication.

✓	The selected finding is clearly communicated. Design choices foster communication between the reader and the visualization. Visualization does not add additional colors, shapes, or other design elements in an unnecessary way. Rather, each additional element should add to the insight being made.
	Great work on providing clear labeling for each of your charts.

Design

✓	Color choices must accurately reflect the data and be chosen with accessibility in mind. For example, values that span from negative to positive numbers should be encoded with a diverging palette. Also, the color palettes should work for colorblindness.
	Nice use of color combination and font is good everywhere.
